

Make the Professional Choice

“After searching through all of the different bollards and beacons on the market I realized a need for a new fixture. One that caused no light trespass, was dark sky friendly and able to withstand harsh marine environments. My first call was to Bill Locklin at Nightscaping®. Bill’s team quickly and effectively developed the INTEGRA Liter which met all of my criteria. What a hit the INTEGRA Liter has been with my clients! I specify the INTEGRA Liter for docks and decks on almost every system I design. Nightscaping® has proven once again, it is the international leader in design and innovation for the outdoor lighting industry.”
